Presentation of Diplomas and Awards

**Video Production Documentation Course**

Students become visual storytellers by operating video cameras and editing systems, as well as audio and lighting equipment. They learn the principles of framing and composition, camera placement, audiovisual editing, script-writing and visualization. Students receive a basic working knowledge of applications for television, electronic news gathering, electronic field production, and combat documentation. This course prepares them for their future mission, supporting operational commanders in areas of operations and public affairs.

**Graduating Students**

03 July 2007 - 24 October 2007
